vitrum 400

Vitrum 400 wall mounted, illuminated, poster cases and notice boards

With a wide range of range of options, the Vitrum 400 is one of the most versatile wall mounted poster cases suitable for outdoor use currently available. It can also be used to accommodate multiple notices and can be made to bespoke specifications if required.

The Vitrum Range

All poster cases within the Vitrum range are superbly engineered using aluminium profiles and have an attractive, contemporary styled frame with ceramic borders.

They are designed for outdoor use, though look equally at home inside a building, and are secure, watertight and lockable.

The 5mm ESG toughened glass covers are side or top hinged using gas cylinders that allow easy access to change or update graphics content. The covers are secured with a unique pressurised locking mechanism which will resist all but the most aggressive vandalism.

Vitrum poster cases are available either non-illuminated or with LED powered back lit illumination. The unique design of the LED sheet produces an exceptional brightness with even lighting across the entire panel which other forms of lighting cannot match. The LED panel has its own aluminium frame which cleverly holds the image directly behind the glass covers producing a stunning effect.

The LED lighting system carries a guarantee of 50,000 hours of illumination with no servicing required and uses just one third of the energy of traditional lighting.
